- Transportation enhancement
- Urban design
- Documentation for Grant Applications
- Bicycle and pedestrian planning
- GIS
- Public involvement

Miami Township Center

## **Beechmont Avenue Corridor Study Update, Vision Plan and Enhancement**

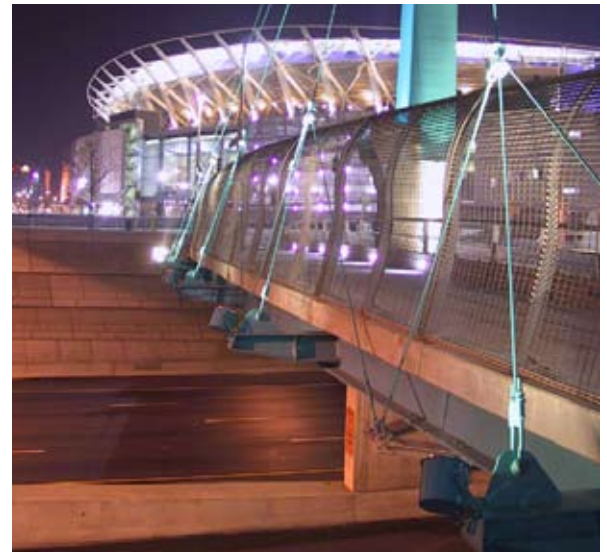

*Client: Anderson Township, Ohio*

KZF provided an existing transportation system analysis and recommendations for safety, traffic and capacity improvements along four miles of SR 125. Recommendations such as signalization, service roads, access control, safety upgrading and other improvements were included in the study. Today, KZF provides continual ongoing services to the client regarding this project.

## **SR 28 Access Management Study**

*Client: Miami Township, Ohio*

KZF provided an access management study for a two-mile area beginning east of the SR 28 bypass and continuing east to the Miami Township limits in Clermont County. KZF identified safety upgrading and access improvements for this corridor.

*Our Transportation Planning Group is multi-disciplinary and our experts have experience in both large and small planning projects.*

### **■ Jon Wiley, PE**

#### **Senior Traffic Engineer**

Jon Wiley has 25 years of experience in transportation and traffic planning, engineering, NEPA and documentation for grant applications.

### **■ Brad Ackel, PE**

#### **Civil Engineer**

Brad Ackel has 10 years of engineering experience in transportation planning and engineering, including transportation enhancement projects.

### **■ Eric Anderson**

#### **Community Planner/GIS Specialist**

Eric's experience and talented graphic skills and website designs aid our clients in visually perceiving their concepts and ideas. He provides firm-wide GIS support for all phases of project design, transportation planning, presentation graphics, construction documentation, minor civil engineering, public involvement, and 3D modeling.
